COUGAR MEN
E-COMMERCE WEBSITE

Web Technologies — Assignment 2
Completion Report

Student	**Muhammad Umar**
Project Type	Static, responsive e-commerce website
Technologies	HTML5, CSS3, Bootstrap 5

1. Project Overview

This project is a static, responsive e-commerce website inspired by the Cougar Pakistan online store. It presents a men's clothing and footwear collection through a homepage, category sections, product cards, and a product detail page.

2. Reference Website

Website name: Cougar Pakistan

Website URL: https://cougar.com.pk/men

3. Implemented Features

- Responsive navigation bar
- Hero banner with a Shop Collection link
- Product category sections for T-shirts, shirts, and footwear
- Product cards displaying images, names, prices, and Add to Cart buttons
- Classic T-Shirt product detail page with description and quantity selector
- Footer with customer-support and company-information sections
- Responsive styling using CSS and Bootstrap 5

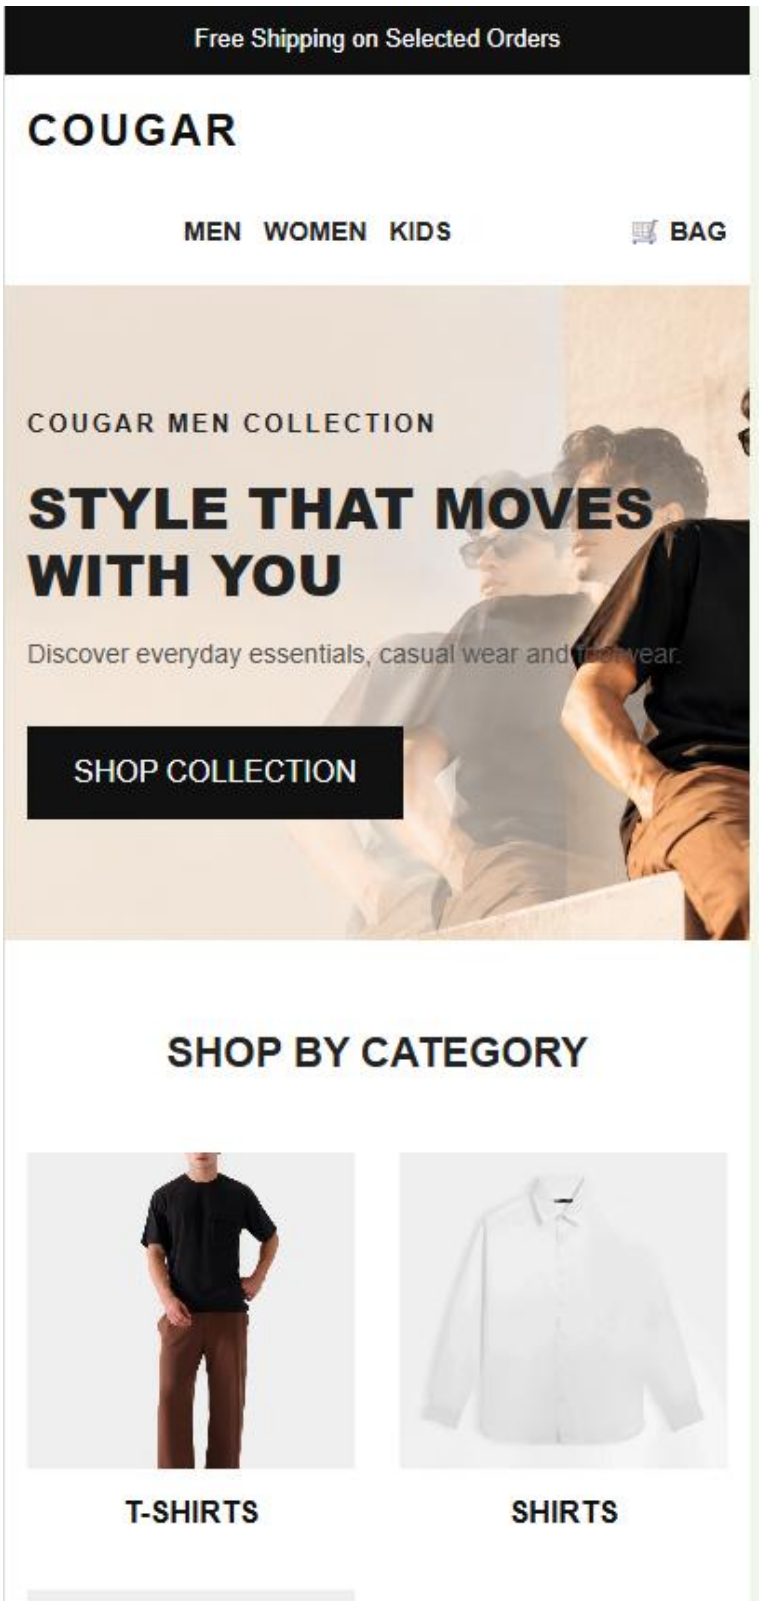

4. Project Files

- index.html — homepage and product listings
- product.html — product detail page
- style.css — custom website styling
- Images/ — images used across the website
- README.md — project information and reference details

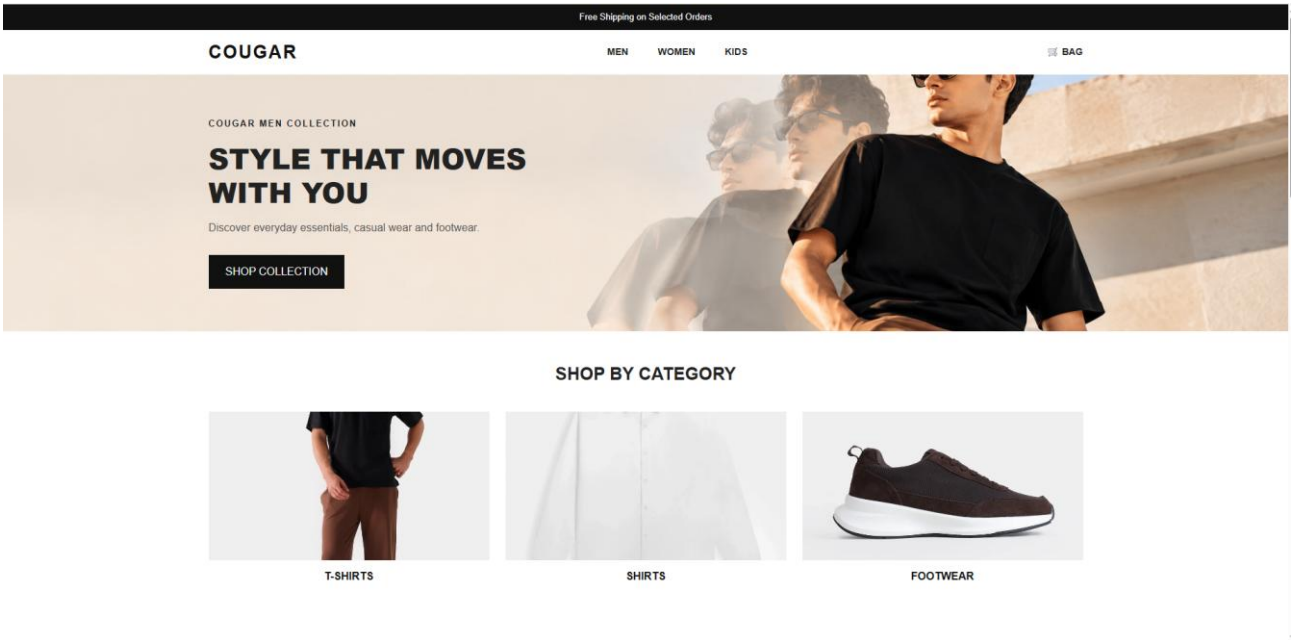

5. Website Screenshots

The following screenshots show the implemented website. Captions and images can be edited or replaced in Word.

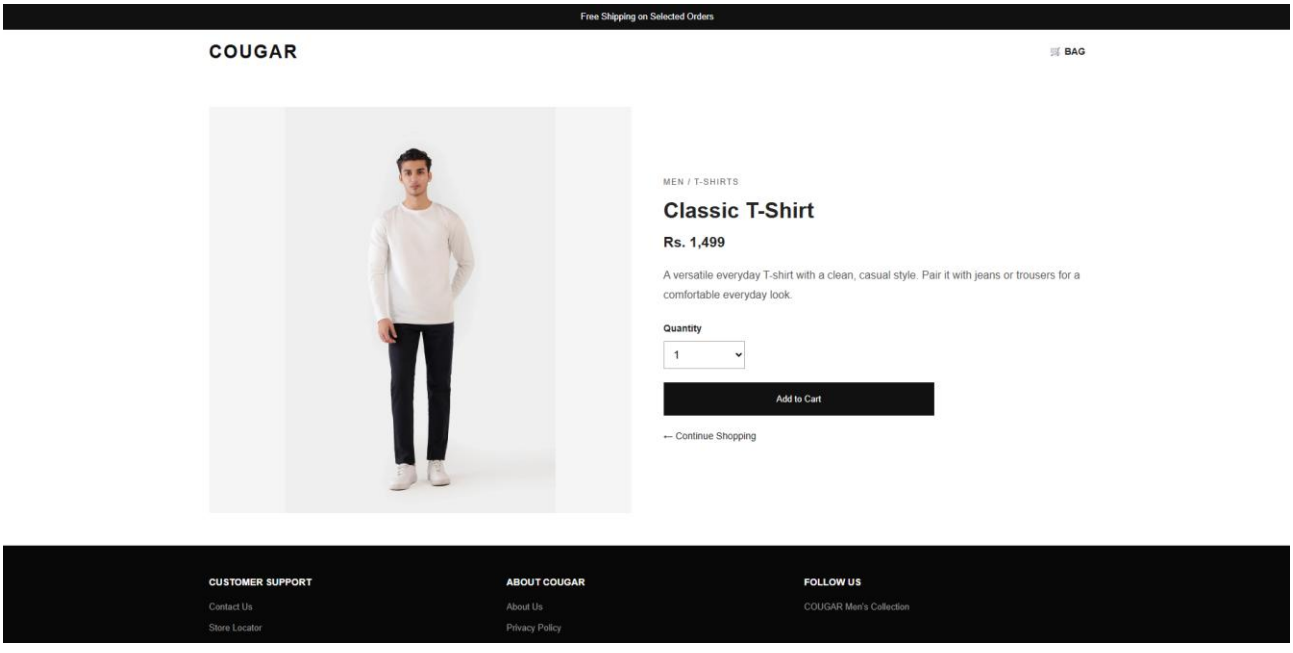

Screenshot 1. Homepage — mobile view

Screenshot 2. Homepage — desktop view

Screenshot 3. Product detail page — desktop view

Screenshot 4. Footwear product listing section
